

# HOSPITALITY INDUSTRY

Enabling the digital customer experience

Emerging technologies and disruptive business models are giving travelers endless information and options at their fingertips, while simultaneously raising the expectation for an enticing and personal experience at every touch point and channel.

Hospitality companies require smart use and integration of data, a modern IT operational core, and strategic application of technology to deploy a seamless and intimate guest experience – before, during and after the stay.

## WHAT WE DO

Tim Tech Consults partners with hospitality companies to ensure their IT organizations deliver on new business requirements and guest expectations, while realizing new opportunities to grow revenue and elevate guest experience.

We modernize, integrate, automate, and manage complex technology environments – gaining efficiencies, reducing costs, and realizing continuous digital opportunities that optimize Average Daily Room Rate (ADR), maximize Revenue per Available Room (RevPar), and enhance the end-to-end guest experience.

## HOSPITALITY OPPORTUNITIES

- OTA Management & Integration
- Property Management Solutions
- HR Training & Compliance Solutions

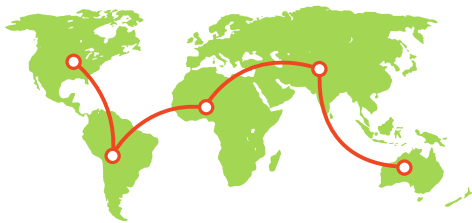

### Creating a High Performance Back Office

- ERP and Supply Chain Visibility & Flexibility
- Procurement Services & Solutions

**GLOBAL  
HOTEL COMPANY**

**OVER 5,000 HOTELS IN  
OVER 100 TERRITORIES  
AND COUNTRIES**

**NEEDED TO STABILIZE  
PLATFORMS TO  
INCREASE EFFICIENCIES**

## CASE STUDY

### The Client.

Global hotel company that has 12 brands and operates 5,000 hotels in over 100 territories and countries.

### The Challenge.

The client had a complex IT environment for maintenance and support, with low predictability and performance. With poor process and too many vendors, their website was unstable and experienced downtime that negatively impacted direct bookings. They were disabled by high operational costs and lack of efficiency, which hindered growth and innovation.

### The Solution by Tim Tech Consults.

Tim Tech Consults established teams to support all B2C and B2B revenue channels, providing the technology maintenance and support mechanism needed to stabilize the platforms, while reducing costs and increasing efficiencies. This enabled a reallocation of investments to drive technology innovations that increased RevPar, including a Tim Tech Consults agile development team dedicated to providing digital enhancements to the functionality of the digital suite.

### The Results.

We consolidated and stabilized the IT environment to streamline processes. This resulted in 83% reduction in application errors, stabilization of the platform, performance improvements and increased efficiencies. We drove down run costs significantly in ADM, allowing our client to refocus investments on innovation efforts, including Tim Tech Consults's enhancements to the digital suite, which increased direct bookings as a result.
